
Which package is right for you?

Silver is the package that lets us maintain your system during the hottest months and make sure that your plants are receiving optimal water.

Gold packages allow us to check your system monthly through the growing season to ensure optimal plant growth. We also monitor it through spring and fall when water requirements are much less thereby saving you money on your water bill.

Platinum is a great package for customers with high maintenance gardens and/or new plantings. We come every two weeks during the growing season.

Did you know?

The cost of water is rising close to 10% each year for the next 5 years. The average irrigation system costs thousands of dollars a year to operate. New advancements in timers and nozzles over the past few years make it possible to save approximately 30 to 40 percent on your irrigation water bill. Now is the time to look at making your system as efficient as possible.
